See What *Your Skin* Is Capable Of

Your skin has a remarkable ability to renew itself. SkinPen® treatments stimulate natural collagen production and reduce the appearance of facial acne scars and neck wrinkles.

Alexa Vossler, SkinPen® Patient.

 Minimal Downtime

 No Harsh Heat, Lasers or Chemicals

 Improves The Appearance of Facial Acne Scars

 Improves The Appearance of Neck Wrinkles

 Boosts Collagen Production

SkinPen® Precision Elite Microneedling System is a medical device intended to treat facial acne scars in adults aged 22 years or older. SkinPen® Precision Elite Microneedling System is also intended to help improve the cosmetic appearance of fine lines, wrinkles, stretch marks, surgical scars, enlarged pores and pigmentation conditions (dyschromia). Indications and body treatment areas for SkinPen® Precision Elite may vary based on your country.

The Science Behind The *Results*

Each SkinPen® treatment creates micro-injuries that stimulate collagen production, working below the skin's surface to renew and repair itself.

Your provider will customise your SkinPen® treatment to match your skin type and goals.

3 Steps To Radiant Skin²

1. Refresh

SkinPen® helps refresh your skin by activating its natural repair process and growth factors, preparing skin to renew from within.

2. Renew

Fresh, healthy skin cells and collagen are formed, helping improve and renew your skin.

3. Reveal

Over time, the skin regenerates, revealing a more radiant, healthier appearance.

Discover Your Customised SkinPen® Journey

Each treatment continues your skin's regeneration, with best results achieved after at least 3 treatments.³

Consultation

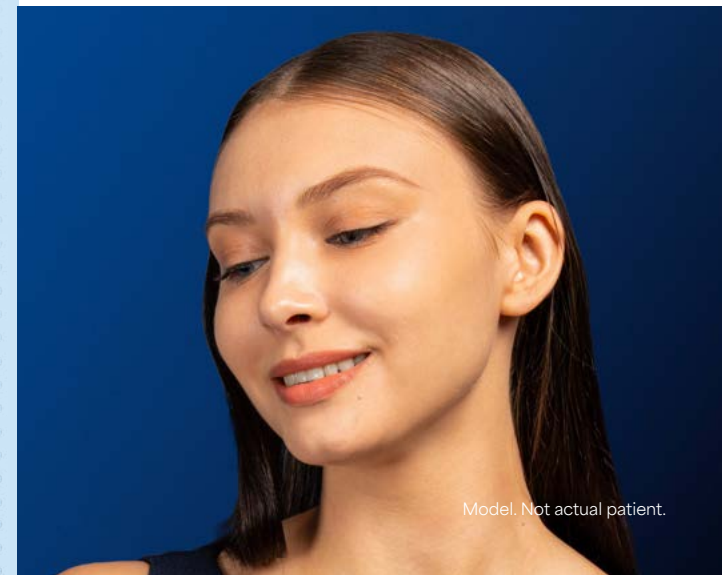

Your provider will customise your SkinPen® treatment to match your skin type and goals.

Treatment

Through an approximately 30-minute treatment, SkinPen® creates micro-injuries that stimulate collagen production and support your skin's natural renewal process.

Recovery

Mild redness, tightness or dryness (similar to a light sunburn) may occur for 1 - 3 days. Clinically proven results that improve with each treatment.⁴
